1. Stretch Marks mon Causes and How To Get Rid of Them

Stretch marks are set-in streaks that show up on your stomach, breasts, hips, butt, and thighs. These long, thin, rippled marks are also called stria. If you have **stretch marks**, you probably wish...

2. Stretch marks

Stretch marks (striae) are indented streaks that often appear on the abdomen, breasts, hips, buttocks and thighs. Over time they become less noticeable. **Stretch marks** are particularly common in pregnant women, especially during the last trimester. Treatment can make **stretch marks** fade, but it won't completely remove them.

3. Stretch marks Why they appear and how to get rid of them

A **stretch mark** is a type of scar that develops when our skin stretches or shrinks quickly. The abrupt change causes the collagen and elastin, which support our skin, to rupture. As the skin heals, **stretch marks** may appear. Not everyone develops these narrow bands on their skin.

4. Stretch marks

Stretch marks, also known as Striae or Striae distensae, are a form of scarring on the skin with an off-color hue. Over time they may diminish, but will not disappear completely. **Stretch marks** are caused by tearing of the dermis during periods of rapid growth of the body, such as during puberty or pregnancy.

5. Stretch Marks Causes Diagnosis and Treatments
